## PROJECTS

### • Mobile App Project- Ronda Co-working

Professional group project with 4 people.

Mobile App development. It allows the registration of users and companies, room reservations, implementation of Google Calendar and AWS, chat between users, posts and admin panels.

- I organized the back-end in full and I made the daily planning of goals with Trello
- I trained the team in the use of the API from Google Calendar and AWS
- I created the views and functions in the front-end and I also made the layout with the designer in CSS
- I was in charge of dealing with the client and giving the presentations.

Technologies: PostgreSQL - Sequelize - Express - React Native - Redux - NodeJS - Passport- JWT - API Google Calendar - AWS

### • E-Commerce Project - devMusic

Group project with 4 people, in two weeks.

We developed an E-commerce about musical instruments. It allows user registration, admin panel with many functions, shopping cart, reviews and a search bar.

- I organized all the front-end and most of the views with their functions.
- I modularized the back-end so as to have a clean and clear code.

Technologies: PostgreSQL - Sequelize - Express - ReactJS - Chakra UI - Redux - NodeJS - Passport

### • Open Movie Database Project- Netlify

Individual Project in one week.

Movies' page, it allows the user to register and search movies as well as save favorites.

Technologies: PostgreSQL - Sequelize - Express - ReactJS - Chakra UI - API REST
